Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,5, 10 rejected under 35 U.S.C. 102(e) as being anticipated by
Hopkins-6,328,638.

Hopkins discloses a method and apparatus for abrasive recovery comprising a slurry intake system with a self-clearing nozzle 268 providing back flow (via 113) to clear out slurry, a separator (120) for recycling finer particles from abrasive particles with one or more filters (121), a fluidized bed dryer (300) Having heating elements.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3,4,6,7 are rejected under 35 U.S.C. 103(a) as being unpatentable over
Hopkins in view of Miyata et al.-5,799,643.

Art Unit: 3723

Hopkins does not disclose using a "shaker table or vibratory table". However, Miyata et al. teaches separating and filtering out slurry particles for recycling by using a vibratory filter (106). Therefore, it would have been obvious to one of ordinary skill in the art at time invention was made to use a vibratory filter, as taught by Miyata, in the recycling apparatus disclosed by Hopkins in order to more accurately filter out recyclable particles for reuse. Hopkins discloses a sensor (317) for controlling the bed dryer. To use a thermocouple would have been an obvious design expedient. In addition, it is old and well-known to use brushes or pressing means with filters to prevent clogging and this would be within the level of ordinary skill to provide to the filter of Hopkins.

Allowable Subject Matter

Claims 8 and 9 appear allowable over the prior art of record.
